Lanner

What Do Lanner Products Do?

Lanner Electronics Inc is a world leading provider of advanced network devices, industrial computers, embedded computers, vehicle PCs, engineering and hard- ware. With over 30 years of experience, Lanner provides reliable and customizable computing platforms with high quality and performance.

Taiwan based electronics manufacturer in board and system designer **Lanner** has adopted the principle of being the best in price/performance and keeping customer satisfaction at the highest level.

About the Network Appliances

Lanner offers network appliances for every type and size of business', allowing the customers to choose the ideal hardware for their needs.

- Desktop Network Appliances
- Rackmount Network Appliances
- White Box Hardware Solutions
- Network Processing Appliances
- Wide Temperature Network Appliances

About the Telecom Datacenter Appliances

Lanner telecommunication appliances provide carrier-grade, open standard solutions for enterprise sites and data centers while enabling scalable network bandwidth.

- HybridTCA Platforms
- Vcpe/Ucpe Platforms
- Cloud Storage Platforms
- Video Transport Platforms
- Modules and Blades

About the Industrial Communication Platforms

A product line designed for industrial environments, aiming to improve product performance by featuring dual-power input, easier I/O access, isolation protection, support for fiber-optic modules and other improvements.

- Industrial Cyber Security Box PC
- Industrial DIN Rail Box PC
- Industrial Rackmount Box PC

About the Vehicle Computers

In-vehicle PCs compatible with a wide range of mobile applications, can be used for infotainment purposes as well as tracking and monitoring, may be mounted in taxis, buses, airplanes and railway systems.

- Vehicle NVR
- Vehicle Gateway Controller
- Rolling Stock Computers

About the Embedded Box PCs

These industrial PCs are designed for wide deployment in application specific environments, built on single board computers.

- Industrial Automation
- Digital Signage
- Surveillance

About the Extension Modules

These industrial PCs are designed for wide deployment in application specific environments, built on single board computers.

- LTE Radio Modules

Lanner

Lanner is the world's number one provider of advanced networking devices, possibly computing, engineering. With more than 30 years of experience, it offers quality and performance under the name of Lanner Products.
